BioSystems

Author index

Volume 43 (1997)

Begorre, H. **43**, 145

Dassow, J. **43**, 169
de Medinaceli, L. **43**, 145
Dorigo, M. **43**, 73
Dubois, D.M. **43**, 97

Ehresmann, A.C. **43**, 25
Elitzur, A.C. **43**, 41

Gambardella, L.M. **43**, 73
Gernert, D. **43**, 179
Gray, J.E. **43**, 55
Gregorius, H.-R. **43**, 137

Heinrich, R. **43**, 1
Hofestaedt, R. **43**, 69
Hurpeau, J.-c. **43**, 145

Kakuyama, K. **43**, 199

Lima-de-Faria, A. **43**, 115

Merle, M. **43**, 145
Miki, Y. **43**, 199
Mitrana, V. **43**, 169

Norwich, K.H. **43**, 189

Ogryzko, V.V. **43**, 83
Ono, N. **43**, 63

Salomaa, A. **43**, 169
Soda, K. **43**, 199
Steiner, W. **43**, 137

Takahara, Y. **43**, 63

Vanbremeersch, J.-P. **43**, 25
Vogt, A. **43**, 55

Wolf, J. **43**, 1
Wong, W. **43**, 189

BioSystems

Subject index

Volume 43 (1997)

Absolute judgment; Information; Statistical bias; Sensory simulation; Theory of senses **43**, 189

Adaptability; Reinforcement; Genetic coherence; Single-locus model; Mating system; Speciation; Polymorphism **43**, 137

Adaptive behavior; Ant colony optimization; Computational intelligence; Artificial life; Combinatorial optimization; Reinforcement learning **43**, 73

Allodynia; Model; Nerve injury; Cold; Pain **43**, 145

Ant colony optimization; Computational intelligence; Artificial life; Adaptive behavior; Combinatorial optimization; Reinforcement learning **43**, 73

Artificial life; Ant colony optimization; Computational intelligence; Adaptive behavior; Combinatorial optimization; Reinforcement learning **43**, 73

Atomic basis; Complexity; Emergence; Evolution; Symmetry; Periodicity **43**, 115

Bifurcation; Cell population; Metabolic oscillation; Synchronization; Stability **43**, 1

Cambrian; Consumer; Permian; Supplier; Trophic dynamics **43**, 63

Cell population; Metabolic oscillation; Synchronization; Stability; Bifurcation **43**, 1

Charges; Coulomb energy; Molecular evolution; Mutants; Proteins **43**, 199

Cold; Model; Nerve injury; Pain; Allodynia **43**, 145

Combinatorial optimization; Ant colony optimization; Computational intelligence; Artificial life; Adaptive behavior; Reinforcement learning **43**, 73

Communication; Information; Probability; Symmetry **43**, 55

Complexity; Emergence; Evolution; Symmetry; Periodicity; Atomic basis **43**, 115

Complex structures; Graph grammar; Pattern generation; Pattern recognition; Pattern transfer; Structural evolution **43**, 179

Computational intelligence; Ant colony optimization; Artificial life; Adaptive behavior; Combinatorial optimization; Reinforcement learning **43**, 73

Computation; Morphological invariance; Symmetry; Information; Thermodynamics **43**, 41

Consumer; Cambrian; Permian; Supplier; Trophic dynamics **43**, 63

Coulomb energy; Charges; Molecular evolution; Mutants; Proteins **43**, 199

Directed mutation; Quantum theory; Measurement; Superposition; Lamarckism **43**, 83

DNA computing; Evolutionary grammars **43**, 169

Emergence; Complexity; Evolution; Symmetry; Periodicity; Atomic basis **43**, 115

Evolutionary grammars; DNA computing **43**, 169

Evolution; Complexity; Emergence; Symmetry; Periodicity; Atomic basis **43**, 115

Genetic coherence; Reinforcement; Single-locus model; Mating system; Speciation; Polymorphism; Adaptability **43**, 137

Graph grammar; Complex structures; Pattern generation; Pattern recognition; Pattern transfer; Structural evolution **43**, 179

Information; Absolute judgment; Statistical bias; Sensory simulation; Theory of senses **43**, 189

Information; Communication; Probability; Symmetry **43**, 55

Information; Morphological invariance; Symmetry; Computation; Thermodynamics **43**, 41

Information processing; Symmetry-breaking; Memory evolutive systems **43**, 25

Lamarckism; Quantum theory; Measurement; Superposition; Directed mutation **43**, 83

Mating system; Reinforcement; Genetic coherence; Single-locus model; Speciation; Polymorphism; Adaptability **43**, 137

Measurement; Quantum theory; Superposition; Directed mutation; Lamarckism **43**, 83

Memory evolutive systems; Information processing; Symmetry-breaking **43**, 25

Metabolic oscillation; Cell population; Synchronization; Stability; Bifurcation **43**, 1

Model; Nerve injury; Cold; Pain; Allodynia **43**, 145

Molecular evolution; Charges; Coulomb energy; Mutants; Proteins **43**, 199

Morphological invariance; Symmetry; Computation; Information; Thermodynamics **43**, 41

Mutants; Charges; Coulomb energy; Molecular evolution; Proteins **43**, 199

Nerve injury; Model; Cold; Pain; Allodynia **43**, 145

Pain; Model; Nerve injury; Cold; Allodynia **43**, 145

Pattern generation; Graph grammar; Complex structures; Pattern recognition; Pattern transfer; Structural evolution **43**, 179

Pattern recognition; Graph grammar; Complex structures; Pattern generation; Pattern transfer; Structural evolution **43**, 179

Pattern transfer; Graph grammar; Complex structures; Pattern generation; Pattern recognition; Structural evolution **43**, 179

Periodicity; Complexity; Emergence; Evolution; Symmetry; Atomic basis **43**, 115

Permian; Cambrian; Consumer; Supplier; Trophic dynamics **43**, 63

Polymorphism; Reinforcement; Genetic coherence; Single-locus model; Mating system; Speciation; Adaptability **43**, 137

Probability; Communication; Information; Symmetry **43**, 55

Proteins; Charges; Coulomb energy; Molecular evolution; Mutants **43**, 199

Quantum theory; Measurement; Superposition; Directed mutation; Lamarckism **43**, 83

Reinforcement; Genetic coherence; Single-locus model; Mating system; Speciation; Polymorphism; Adaptability **43**, 137

Reinforcement learning; Ant colony optimization; Computational intelligence; Artificial life; Adaptive behavior; Combinatorial optimization **43**, 73

Sensory simulation; Information; Absolute judgment; Statistical bias; Theory of senses **43**, 189

Single-locus model; Reinforcement; Genetic coherence; Mating system; Speciation; Polymorphism; Adaptability **43**, 137

Speciation; Reinforcement; Genetic coherence; Single-locus model; Mating system; Polymorphism; Adaptability **43**, 137

Stability; Cell population; Metabolic oscillation; Synchronization; Bifurcation **43**, 1

Statistical bias; Information; Absolute judgment; Sensory simulation; Theory of senses **43**, 189

Structural evolution; Graph grammar; Complex structures; Pattern generation; Pattern recognition; Pattern transfer **43**, 179

Superposition; Quantum theory; Measurement; Directed mutation; Lamarckism **43**, 83

Supplier; Cambrian; Consumer; Permian; Trophic dynamics **43**, 63

Symmetry-breaking; Information processing; Memory evolutive systems **43**, 25

Symmetry; Communication; Information; Probability **43**, 55

Symmetry; Complexity; Emergence; Evolution; Periodicity; Atomic basis **43**, 115

Symmetry; Morphological invariance; Computation; Information; Thermodynamics **43**, 41

Synchronization; Cell population; Metabolic oscillation; Stability; Bifurcation **43**, 1

Theory of senses; Information; Absolute judgment; Statistical bias; Sensory simulation **43**, 189

Thermodynamics; Morphological invariance; Symmetry; Computation; Information **43**, 41

Trophic dynamics; Cambrian; Consumer; Permian; Supplier **43**, 63
